ENGINEERING DISCIPLINE & GLOBAL IMPACT

Forward Deployed Engineering & Architecture

Proven track record deploying complex zero-to-production AI and distributed systems for international enterprise clients across US, UK, and Europe.

Forward Deployed AI Engineer & Systems Architect. Dedicated to hands-on, high-velocity zero-to-production engineering — transforming complex distributed problems into resilient, fault-tolerant software built for real-world impact. Proven execution across **Enterprise B2B client architectures** (multi-tenant ERP portals, real-time NetSuite synchronization, fleet telematics, and automated merchant lifecycle engines) and **consumer-facing B2C applications** (real-time avatar intelligence, automated video-to-shorts creators, and cross-platform mobile apps).

Deep engineering foundation bridging **Autonomous Robotics & Embedded Systems (ROS/ROS2, sensor fusion, Byzantine-resilient perception)** with modern **Machine Learning (ML), Deep Learning (DL), Reinforcement Learning (RL), and Generative AI / LLMOps**. Expert in orchestrating multi-agent state machines via LangGraph, training PyTorch deep models & RL policy optimization (DQN, PPO), and deploying hybrid dense/sparse RAG pipelines (Pinecone, MongoDB Atlas).

01 ML, Deep Learning & RL

PyTorch & TensorFlow, Deep Q-Networks (DQN), Policy Gradients / PPO, reward modeling, Vision Transformers (ViT), CNNs, Scikit-Learn, and feature engineering.

02 Multi-Agent Swarms & LLMOps

State machine graphs with LangGraph, Claude 3.5 Sonnet, Gemini 2.5 Flash. Multi-tier prompt routing, context compression, and deterministic tool validation.

03 Cloud & Systems Architecture

GCP Cloud Run multi-tenant backends, FastAPI (Python 3.12), NetSuite SuiteQL streaming mirrors, Celery Beat schedulers, and Cloud SQL PostgreSQL 18.

04 Robotics & Zero-Trust Secrets

ROS/ROS2 perception pipelines, MediaPipe 468-point mesh, Zero-Shot CLIP, pure ASGI auto-decryption, AES-GCM / ChaCha20, and repo-bound cryptographic vaults.

International Clients & Enterprise Organizations

AI & MULTI-AGENT:	LangGraph Swarms · Claude 3.5 Sonnet · Gemini 2.5 Flash · Pinecone · MongoDB Atlas Vector · Agentic RAG · Explicit Context Caching
LANGUAGES & CORE:	Python 3.12 · FastAPI · SQL · TypeScript · C / C++ · Bash / BAT · AsyncIO · ROS / ROS2
CLOUD & INFRA:	GCP Cloud Run · Docker Multi-Stage · Postgres 18 · Redis · Celery Beat · Nginx · N8N Enterprise · Zero-Trust Vaults

PRODUCTION PROJECTS & DEPLOYMENTS

High-Impact FinTech & Enterprise Deployments

#01. Volvexer — Global Multi-Ledger Accounting & Reconciliation Automation ↗

2024 – Present | Enterprise Platform

Volvexer · Global Financial Services (USA, UK, Australia, Pakistan)

MULTI-LEDGER SYNC · QUICKBOOKS · XERO · NETSUITE · ZOHO BOOKS · PYTHON · OCR

- **Multi-Ledger Integration:** Engineered high-throughput bi-directional synchronization engines interfacing QuickBooks Online, Xero, NetSuite, and Zoho Books with automated currency rate updates and zero manual data entry.
- **Intelligent OCR & Document Processing:** Built multi-currency vendor bill and VAT invoice pipelines with automated classification, line-item splitting, and zero-leak document vaults — reducing month-end closing time by 75%.
- **Compliance & Infrastructure:** Deployed automated multi-tenant audit logging and cryptographic storage ensuring SOC 2 readiness and seamless multi-jurisdiction financial reporting across US, UK, AUS, and PK.

#02. Enterprise Operations Portal — Cloud & ERP Systems Architecture ↗

2025 – 2026 | Production · Live

Ambica International · United States (Remote)

GCP CLOUD RUN · FASTAPI · NETSUITE ERP · CLAUDE LLM · DOCUSIGN · POSTGRES 18 · REDIS

- **Cloud Architecture:** Architected multi-tenant operations portal on GCP Cloud Run using FastAPI (Python 3.12), PostgreSQL 18 (Cloud SQL), Celery Beat, Redis, and multi-stage Docker containers.
- **Live NetSuite Sync:** Engineered real-time SuiteQL synchronization pipeline mirroring employees, purchase orders, inventory, and customer records with sub-second change propagation via Celery Beat + Redis.
- **AI Ops-Intelligence & Security:** Built Claude LLM WhatsApp/Gmail intake classifier, DocuSign e-sign REST integrations, MS Entra ID SSO, and 3-layer OTP authentication with 10-minute expiry and attempt-limiting.

#03. Ranbval Secret Manager — Zero-Knowledge Cryptographic Secrets Vault ↗

2025 – Present | NLnet Grant · Open Source

Ranbval Security Platform · Global Open-Source & Enterprise SaaS

ZERO-TRUST ARCHITECTURE · CRYPTOGRAPHIC VAULTS · REPO-BOUND TOKENS · PYPI & NPM SDKS

- **Zero-Trust Infrastructure:** Engineered self-hostable control plane replacing plaintext .env files with AES-GCM-256 and ChaCha20Poly1305 encryption, offline verification, and repo-bound cryptographic tokens.
- **Dual Runtime SDKs:** Authored production verification libraries for Python (PyPI) and Node.js (npm) achieving 11,500+ global downloads with pure ASGI auto-decryption and sub-2ms latency.
- **Grant & Academic Validation:** Awarded NLnet Foundation (Netherlands · NGI Zero-Trust) research grant review and Ignite National Technology Fund for enterprise cryptographic validation at scale.

PRODUCTION PROJECTS & DEPLOYMENTS

Screening Automations, LLM Caching & Autonomous Media

#04. Automated Candidate Screening & Device Intelligence System ↗

Apr 2026 – Oct 2026 | Enterprise Automation

Savvy Programmers · United States (Remote)

JOTFORM ENTERPRISE · BAT AUTOMATION · DEVICE TELEMETRY · DATA CONTINUITY

- **Multi-Step Candidate Pipeline:** Designed high-volume screening architecture unifying application intake, live hardware vetting, and automated interview scheduling into unified profiles, cutting vetting time by 60%.
- **Custom BAT Telemetry Engine:** Built silent BAT automation collecting hardware specs (CPU cores, RAM, GPU, OS build) to verify remote engineering workstation compliance with zero user friction.
- **Data Continuity & Email Mapping:** Overcame third-party form pagination limits via dual-form schema architecture and email-keyed indexing, enabling reliable end-to-end candidate record unification.

#05. Chatbot Engineer — AI Sales Intelligence Backend ↗

2025 – 2026 | Commercial AI

Enterprise Sales Infrastructure · Contract

VOICEFLOW · N8N · GEMINI 2.5 FLASH · EXPLICIT CONTEXT CACHING · POSTGRES

- **Explicit Context Caching:** Implemented Google Gemini `/v1beta/cachedContents` context caching on N8N, slashing LLM token ingestion costs by 85% and cutting response latency under 600ms.
- **4-Case Routing Engine:** Built automated cache lifecycle manager handling cache creation, refresh, TTL expiration, and cold fallback with database-level per-user session caps.
- **Postgres Hydration Layer:** Engineered single-query client data hydration delivering instantaneous multi-turn sales context across high-volume inbound prospect dialogues.

#06. AI-Powered Video to Shorts Autonomous Media Automation ↗

2025 – 2026 | Production System

TariqDreamsTech · Autonomous Media Pipeline

FASTAPI · CELERY · FFMPEG · OPENAI WHISPER · PYTHON 3.12 · YOUTUBE API

- **Asynchronous Media Engine:** Built FastAPI and Celery pipeline orchestrating FFmpeg dynamic cropping, OpenAI Whisper audio transcription, and 9:16 vertical re-framing for long-form video assets.
- **Hook Detection & Animated Subtitles:** Implemented semantic LLM hook discovery identifying high-retention segments and generating word-level animated subtitle overlays automatically.
- **Autonomous Syndication:** Integrated YouTube Data API v3 for zero-touch horizontal-to-vertical content repurposing, scheduling, and direct channel upload.

PRODUCTION PROJECTS & DEPLOYMENTS

Multi-Agent QA, Answer-First SEO & Payment Systems

#07. AI Persona, CSR & Action Item Analysis System ↗

Feb 2026 – Oct 2026 | Enterprise AI

Savvy Programmers · United States (Remote)

N8N ORCHESTRATION · GEMINI 2.5 PRO · SUPABASE · MULTI-AGENT STATE GRAPH

- **Automated Transcript Analysis:** Architected N8N pipeline parsing raw call recordings, extracting friction points, and categorizing sentiment across a 5-tier behavioral scoring framework (L1–L5) within 45 seconds.
- **Jira & Supabase Automation:** Programmatically generated structured Jira action items with severity tagging, routing critical customer escalations to engineering teams — reducing manual QA review by 90%.
- **LinkedIn Profile Enrichment:** Built Scrapin.io API integration with exponential backoff retry logic, enriching corporate prospect profiles into versioned Supabase CRM analytics dashboards.

#08. Autonomous Content Generation & SEO Publishing Engine ↗

Feb 2026 – Apr 2026 | Autonomous AI

Autonomous Publishing Network · Remote

MULTI-AGENT AI · WORDPRESS REST API · YOUTUBE API · SCHEMA (JSON-LD) · GHL

- **Multi-Agent Editorial Graph:** Deployed LangGraph state graph with 5 specialized agents: Topic Discovery, Atomic Outline Planning, Draft Synthesis, Fact Validation, and JSON-LD schema generation.
- **Programmatic WordPress REST API:** Automated multi-site publishing with contextual internal linking, image prompt synthesis, and real-time Google Indexing API pings for immediate crawl submission.
- **Answer-First Quality Standards:** Produced 30+ comprehensive long-form articles per cycle with autonomous YouTube script generation and structured multimedia asset embedding.

#09. Merchant Onboarding & Underwriting Lifecycle Automation ↗

Feb 2026 – May 2026 | FinTech Platform

Transact Ultd · Iris CRM Integration (United States, Remote)

IRIS CRM · N8N ENTERPRISE · ISO AMP · SMTP · PAYBRIGHT · COMPLIANCE

- **Iris CRM Lifecycle Automation:** Built automated merchant lifecycle workflows on N8N Enterprise, polling CRM lead stage updates and managing required documentation pipelines end-to-end.
- **Statement Analysis & Email Engine:** Automated underwriting document requests via SMTP, parsing multi-page merchant processing statements and updating compliance records in real time.
- **Processor Integrations:** Connected ISO AMP, Paybright, and underwriting endpoints with resilient error logging, cutting onboarding cycle time from 5 days to under 24 hours.

PRODUCTION PROJECTS & DEPLOYMENTS

Workflow Modernization, Computer Vision & Zero-Touch Ops

#10. Digital Operations Transformation & ERP Workflow Modernization ↗

2025 – 2026 Enterprise Ops

Global Enterprise Operations · Remote

NETSUITE ERP · CELERY BEAT · SUITEQL · REDIS · AUTOMATION PIPELINES

- **Legacy Modernization:** Replaced manual cross-department spreadsheets with centralized automated event-driven workflows connecting NetSuite ERP with operational databases and downstream analytics.
- **SuiteQL Delta Extraction:** Configured scheduled SuiteQL extractors with change-tracking, transforming raw relational financial records into actionable real-time dashboards.
- **Schema Validation & Alerts:** Reduced data entry errors by 90% by enforcing strict automated schema validation, Slack alert notifications, and transactional rollback mechanisms.

#11. AI-Driven Service Operations Ecosystem — Qira Project ↗

2025 – 2026 Vision & Audio AI

Computer Vision & Autonomous Audio Systems · Lahore, Pakistan

MEDIAPIPE (468-PT MESH) · OPENCV · FASTAPI · TTS ENGINE · PYTHON

- **MediaPipe Facial Mesh Analysis:** Engineered deep computer vision module using OpenCV and MediaPipe for granular extraction of 468+ facial landmark points in real-time mobile camera streams.
- **Multilingual AI Backend:** Developed asynchronous FastAPI services delivering low-latency audio processing and multi-language AI dialogue generation for context-aware mobile client responses.
- **Edge Optimization:** Applied model quantization and edge inference optimizations ensuring smooth real-time telemetry visualization on standard mobile hardware.

#12. Zero-Touch Service Business Operations Platform ↗

2025 – 2026 Full-Stack Automation

Autonomous Business Systems · Remote

N8N ENTERPRISE · OPENPHONE · HOUSECALL PRO · TWILIO · WEBHOOKS

- **Omnichannel Intake Engine:** Built AI intake automation capturing inbound customer leads from OpenPhone, Google, Angi, and Thumbtack, standardizing disparate inquiries into unified CRM records.
- **Housecall Pro Dispatch:** Connected intake pipelines directly to Housecall Pro API for automated job creation, technician scheduling, and instant quote generation.
- **End-to-End Automation:** Slashed administrative overhead by 80%, coordinating the complete customer lifecycle from initial contact through automated review collection.

PRODUCTION PROJECTS & DEPLOYMENTS

LangGraph Streaming, Vector DBs & Enterprise Integrations

#13. AI Proposal Generation Platform — LLHAM Project ↗

2024 – 2025 Multi-Agent AI

LLHAM Project · Remote (USA)

LANGGRAPH · SUBMODULES · MULTI-AGENT STATE GRAPH · STREAMING · VECTOR RAG

- **LangGraph Multi-Agent Architecture:** Architected dual-repository system with `llham-agents` submodule running specialized agents: Master Agent, Business Analyst, and Technical Architect.
- **Real-Time Token Streaming:** Built stateful checkpointing streaming endpoints allowing users to watch structured technical proposals compile with live token-by-token output.
- **Vector RAG for Grounding:** Integrated dense vector retrieval over corporate case studies and historical proposal libraries for accurate pricing and grounded effort estimation.

#14. Vectorized Database & AI Email Intelligence Engine ↗

Feb 2025 – Mar 2025 Vector Search

InstaMailAI · United States (Remote)

MONGODB ATLAS VECTOR SEARCH · LANGCHAIN · FASTAPI · PYTHON · EMBEDDINGS

- **MongoDB Atlas Vector Search:** Built high-performance semantic search pipeline indexing millions of corporate email threads into high-dimensional embeddings with sub-50ms similarity retrieval.
- **RAG Draft Synthesis:** Implemented dense retrieval augmented generation providing contextually grounded, executive-ready draft suggestions with zero hallucinations.
- **Scalable Architecture:** Designed decoupled FastAPI ingestion endpoints handling asynchronous webhook payloads from enterprise email providers under heavy concurrent load.

#15. Enterprise Automation Workflows & CRM Architecture ↗

May 2025 – Dec 2025 Enterprise N8N

hddisenos · Remote (Venezuela)

N8N ENTERPRISE · REST/SOAP APIS · HUBSPOT · ZOHO CRM · POSTGRESQL

- **Cross-CRM Synchronization:** Architected resilient N8N workflows bridging external REST/SOAP partner endpoints with HubSpot marketing funnels and regional Zoho CRM instances.
- **Error Handling & Retry Queues:** Built custom JavaScript transformation nodes and automated retry queues, reducing manual data synchronization effort by 60%.
- **Database Pooling Optimization:** Tuned PostgreSQL and NoSQL connection pooling to prevent pipeline timeouts during high-volume nocturnal batch processing runs.

PRODUCTION PROJECTS & DEPLOYMENTS

Bilingual Legal AI, SaaS Backends & Serverless ETL

#16. Legal Interview Intelligence & Case Preparation System ↗

June 2024 – Aug 2024 · Legal Tech

Seanz Law Firm · United States (Remote)

OPENAI GPT-4 · TWILIO · WHATSAPP API · GOOGLE LOOKER STUDIO · PYTHON

- **Bilingual Legal Assistant:** Built multilingual (English/Spanish) AI-powered interview assistant on WhatsApp and Twilio for immigration law client intake.
- **Compliance & Reporting:** Enforced strict attorney-client privilege guidelines with zero-retention prompts and real-time paralegal tracking via Google Looker Studio.

#17. Secure Multi-Tenant SaaS & Role-Based Workflows ↗

Jan 2024 – May 2024 · Multi-Tenant SaaS

NVIT Project · United States (Remote)

DJANGO · JWT AUTHENTICATION · OPENAI GPT · POSTGRESQL · JERICHOAI.IO

- **Schema-Level Multi-Tenancy:** Engineered multi-role Django backend (Customers, Engineers, Admins) with strict schema-level tenant isolation and JWT token authentication.
- **AI Ticket Estimation:** Integrated OpenAI GPT for automatic ticket scope estimation, effort prediction, and Jira-style hierarchy duplication.

#18. AI Workflow Automation Platform Backend ↗

Aug 2023 – Dec 2023 · AI Microservices

2456.ai · United States (Remote)

DJANGO · FASTAPI · POSTGRESQL · PINECONE VECTOR DB · STRIPE BILLING

- **Hybrid Microservices:** Architected Django core backend coupled with FastAPI microservices for high-frequency AI workflow computations under concurrent load.
- **Dual Database & Billing:** Managed relational state in PostgreSQL and semantic queries in Pinecone; integrated Stripe webhooks for granular tier-based billing.

#19. Data Engineering & Scalable ETL Analytics Architecture ↗

Mar 2022 – July 2022 · Cloud Data Eng

QPharma Project · United States (Remote)

AWS GLUE · S3 DATA LAKE · AWS LAMBDA · PYTHON PANDAS · EXCALIDRAW

- **Serverless Cloud Pipelines:** Built ETL pipelines using AWS Glue, Amazon S3 data lakes, and Lambda functions to ingest high-volume pharmaceutical sales datasets.
- **Automated Cleansing & Speed:** Accelerated BI and market forecasting cycles by 70%, outputting sanitized analytical tables into Amazon Athena with Pandas-based transformation.

ACADEMIC PEDIGREE & INDUSTRY ACCREDITATIONS

Higher Education, Grants & Verified Certifications

M.S. in Computer Systems Engineering

The Islamia University of Bahawalpur, Pakistan · Session 2026 – 2028

In Progress | Distributed Systems Focus | Zero-Trust Cryptography

Postgraduate research focusing on Distributed Microservice Runtimes, Advanced Machine Learning, Encrypted Zero-Trust Infrastructures, and Autonomous Multi-Agent Robotics.

B.S. in Computer Systems Engineering

The Islamia University of Bahawalpur, Pakistan · Graduated 2020 – 2024

CGPA: 3.40 / 4.00 (79.16%) | 141 Credit Hours | 42 Courses

Comprehensive 4-year engineering curriculum. Awarded Ignite National Technology Fund Grant for Capstone FYDP on ML-driven Network Intrusion Detection Systems (NIDS).

INTERNATIONAL GRANT · 2026

NLnet Foundation Research Grant ↗

NLnet Foundation (Netherlands) · NGI Zero-Trust. In two-round review for Ranbval Secret Manager self-hostable control plane.

NATIONAL RESEARCH GRANT · 2024

Ignite National Technology Fund ↗

Ministry of IT & Telecom, Govt. of Pakistan. Competitively selected and funded for Capstone ML-based Network Intrusion Detection.

ACADEMIC MERIT AWARD

PMYP Laptop Scheme Selection

Prime Minister's Youth Programme. Awarded high-performance workstation under national competitive merit standing for academic excellence.
